**NEXT MEETING Sun 14<sup>th</sup> Dec. 2008 at 1.30 pm**

*Party Time*

**SPEAKER:** Next meeting is our Xmas social afternoon. **Note:** non-members and visitors \$5 entry. This a day for us to relax, partake in a sumptuous afternoon tea sponsored by the HOS (from our regular supplier White Flower Bakery owned by member **Dieu Tran**) and enjoy talking to others about orchids with time to have a good look at the plants on display. If time permits we may have a short repotting demonstration and don't forget Santa may make an appearance.

**LAST MEETING:** What an amazing day. A huge turnout of members combined with possibly the best ever club display of flowering orchids I have seen anywhere, plus an enormous number of orchids and accessories to auction. With such a huge amount to get through we wasted no time in getting our auctioneer **Jim** into action. It was a slow start but some of the more desirable items were fetching good prices. After a break for afternoon tea we were straight back into it with the auction (action?) culminating in some excellent prices for some of Mabels' traceyanums, Alf's Odonts and finally Lea's large Schombergia, which reached a record \$40. A stupendous effort with a stunning \$830 raised for the society. Thanks to everyone who helped and brought in a great selection of plants for this very enjoyable meeting.

**RAFFLE:** Norm Streater went away with the superb Phalaenopsis from HOS. Thanks again to the generous members who donated the other orchids for the raffle.

## **EDITOR'S COMMENT**

One of the advantages of growing orchids is you can get flowers all year round but going by the display last month, spring certainly is a special time for many genera especially Sarcocylus and nobile type Dendrobiums. Unfortunately these miss out on all the main shows and there is a reluctance to buy them when they are not in flower. I saw a lot of good Sarcs at another society's show recently for sale and many went home again. Like most things it is preferable to buy when in flower as sometimes descriptions on sales labels leave a lot to be desired.

At our auction I do try and give as good a description of the plant as I am able, as we want our members to get what they want. I must admit to being quite surprised at the variation in prices we saw though and some very good mature plants being well under valued, particularly the large Cattleyas. I am also surprised at the number of people who ask me about buying a particular plant they see in flower when many of these are actually available at shows earlier in the year although they may not be in flower then. The answer is to do your research and seek advice when buying.

**PRISON:** You get time off for good behaviour. **WORK:** You get more work for good behaviour.

**John Scott** gave a very educational and interesting commentary, although he was nowhere near as kind to me as Alf was last month.

A **very poor** number of votes cast! Maybe you were all voted out the day after the election.

Some entry cards **missing** this month please leave them on the table to be collected.

**If** you had purchased \$1,000.00 of AIG stock one year ago, it would now be worth \$49.00.

With Fannie Mae, you would have \$16.50 left of the original \$1,000.

With Bear Stearns, you would have less than \$5.00 left.

If you had purchased \$1,000.00 of Freddie Mac stock you would have \$49.00 left.

If you had purchased Lehman Bros., you would have nothing left.

But, if you had purchased \$1,000.00 worth of beer one year ago, drank all the beer, then turned in the cans for recycling, you would have \$214.

Based on the above, the best current investment advice is to drink heavily and recycle.

**CULTURE:** I can't emphasize enough that this is such an important time of the year, as most of your orchids will be putting on new growth. It is **now** you should be watering frequently and fertilizing with a high Nitrogen fertilizer. Good air movement is essential so they dry out quickly as some nights are still a little cool.

**Note** if like me you bought a few plants at the orchid fair Labour weekend then **take heed!** Check the potting media otherwise you could be caught out. Some plants are potted in what I would consider a 'commercial' mix suitable for sustained periods of not being watered. I repot ALL my new acquisitions almost without exception unless I know the person well and if they pot up their plants similar to how I do. So far only ONE person has fit that category. Its not a question of whether the grower is an expert, indifferent or a poor grower, it is how YOU grow them and especially the frequency you water your collection.

An Irishman named O'Malley went to his doctor after a long illness.

The doctor sighed, looked O'Malley in the eye and said, "I've some bad news for you. You have cancer, and it can't be cured. You'd best put your affairs in order."

O'Malley was shocked but being a solid character, he managed to compose himself and walk from the doctor's office into the waiting room where his son was waiting. "Well son, we Irish celebrate when things are good and we celebrate when things don't go well. In this case, things aren't so well. I have cancer. Let's head to the pub and have a few pints." After 3 or 4 pints the two were feeling a little less somber.

There were some laughs and some more beers. They were eventually approached by some of O'Malley's friends, who were curious as to what the two were celebrating. O'Malley told them they were drinking to his impending end. He told his friends, "I have been diagnosed with AIDS." The friends gave O'Malley their condolences and they had a couple more beers.

After the friends left, O'Malley's son leaned over and whispered his confusion. "Dad, I thought you told me that you were dying of cancer and you just told your friends that you were dying of AIDS!"

O'Malley said, "I know, I don't want any of them sleeping with your mother after I'm gone."

## **NEW MEMBERS**

Many of you will have bought plants at our auction last month so it is important to learn something about them and the conditions they prefer. Most of what we sold was cool growing with nearly all of the plants coming from growers who grow them cool. As I mentioned above it is a pity some of you didn't do a little more research or listen to some of my comments, as there were some excellent buys to be had, particularly for our newer members. Many of the plants sold well below prices normally seen at show sales tables. I think you will be surprised just how good they turn out when they flower and many will not be able to be purchased again.

Keep your eye open throughout the year if you want sought after plants.

I'm sure that it is getting more difficult to source some of the older reliable species which were once common and that is possibly the reason we saw such determined bidding on these. Many growers will not sell these and other hard to find plants except to regular club members, as so many have been lost to cultivation when sold to the public.

## **COMING EVENTS**

**Final** day: 14<sup>th</sup> Dec. (Xmas Social), enjoy a relaxing afternoon. Bring your flowers to display.

**HOS Club days for 2009:** 8<sup>th</sup> Feb, 8<sup>th</sup> Mar, 12<sup>th</sup> Apr, 10<sup>th</sup> May, 14<sup>th</sup> June, 12<sup>th</sup> July, 9<sup>th</sup> Aug, 13<sup>th</sup> Sept, 18<sup>th</sup> Oct (NB not 2<sup>nd</sup> Sun), 8<sup>th</sup> Nov, 13<sup>th</sup> Dec. Show set up 2<sup>nd</sup> Oct, Show Sat. 3<sup>rd</sup> Oct.

Meetings are held 1.30pm sharp in the Fencible Lounge every month except January.
