

*L. anceps* (Common form, cool grower from Mexico)

*L. anceps* var. *Williamsoniana* (a white with coloured lip)

*L. anceps* var. *Sierra* (Note the improved shape and colour)

*L. anceps* var. *Ashworthiana* (white with more colour in lip)

*L. anceps* var. *Veitchiana* (Much fuller lip and good tonings, one of the more desirable)

*L. albida* (Mexico high altitude cool grower)

*L. autumnalis* (Mexico, cool grower)

*L. lobata* var. *alba* (Brazil intermediate grower, now Sophronitis, very shy to flower!)

*L. grandis* (Warm – Intermediate from low altitudes Brazil, not as easy to grow)

*L. perrinii* (Brazil mid altitude cool – intermediate, now Sophronitis)

*L. jongheana* (Brazil high altitude cool grower, now Sophronitis)

*Cattleya Portia* (Cattleyas differ from Laelias only by number of pollinia)
